

## Les Quan's Post-Orals Study List (if there is a next time!)

Histopathology of periapical lesions

What cell types are present in any given situation?

Vertical cracks

Most frequent causes

Microbiology in cracks

External resorption

Heathersay 2004

Intermediate cementum

Incidence of Oral cancers

Inflammation and Immunology

Classes of Immunoglobulins

Types of Immune responses

Classes of Hypertension

Normal

Prehypertension

Stage I

Stage 2

Review immunology and inflammation basics

Pulpal anatomy

Tooth anatomy - layers

Tooth development

Relearn prior flashcard lists - subject selection was good.

Some subjects I just did not study at all.

***It is a question and answer by memory test. It was a fairly relaxed conversation with my peers (5 of 6 examiners) but with the "sixth" one, it really felt like an interrogation! Memorize your support research so you can respond flawlessly under stress. Try not to get flustered if you don't know every answer, you are not supposed to! They are trying to quickly determine the depth and breadth of your knowledge, so they keep asking questions until you run out of answers.***
