

14th Annual Board Review Course & Scientific Update

January 26- 28, 2024

DESCRIPTION

This virtual 3-day course offers 20 continuing education credits that satisfy both ABE recertification and state CE requirements.

The Board Review Course and Scientific Update aids candidates preparing for the American Board of Endodontics' certification examinations- both oral and written, Diplomates needing recertification credits and all dentists interested in endodontic continuing education credits.

This course will feature a series of highly respected speakers covering a wide spectrum of endodontic topics through live-lecture presentations. The 2024 virtual course will also be recorded, providing all registrants with the ability to view for 30 days following the live event.

FEATURED TOPICS FOR 2024 COURSE:

- *Inflammation and Immunology; and Mechanisms and Management of Endodontic Pain*
- *Endodontic Microbiology*
- *ABE Boardwalk*
- *Evidence-based Outcomes of Nonsurgical and Surgical Endodontic Treatment*
- *Trauma and Resorption*
- *Regenerative Endodontics & Vital Pulp Therapy*
- *Endodontic Surgery*
- *Preparing for the Oral exam and Case Portfolios*
- *Medically Complex Patients /Pharmacology*
- *Radiographic Interpretation; and Diagnostic Process /Oral Pathology /Periapical Diseases*

Endorsements from some last year's attendees of the College of Diplomates Board Review Course:

"This was very well-organized, and I felt was catered towards helping us prepare for the boards. Very comprehensive, I love how ABE questions were incorporated. "

"Bringing new technology and knowledge (history) encourages our residents and practitioners to understand the critical importance of staying current to keep our specialty healthy and strong."

"This is a must for every resident AND practitioner - we need to know how to evaluate literature." *comment from attendee on Dr. Friedman's lecture*

"From her first course with the CoD to this one she has continued to provide essential knowledge of medically complex patients and provides a systematic way to gather and work through information provided in the health and dental histories" *Comment from attendee on Dr. Patton's lecture*

"This was very organized and detailed. I would highly recommend bringing Dr. Kishen back for micro."
